10 Steps to Avoid Scams

- 1. Never send money to someone you have never met face-to-face**
- 2. Don't click on links or open any attachments in unsolicited emails**
- links can download malware on your device and/or steal your identity

3. Don't believe everything you see

- scammers do a good job at copying official seals, fonts and logos
- even caller ID can be faked
- remember if it seems too good to be true, it probably is!

4. Ensure the transaction is secure before buying online

- confirm the website has "https" in the URL & a small lock icon on the address bar
- avoid using public WIFI networks
- avoid storing your passwords and banking information online & on your device

5. Be extremely cautious when dealing with someone you met online

- scammers use dating websites and social media to develop relationships with their targets

6. Never share personal identifiable information

- this includes banking & credit card information, birthdate, Social Insurance Number

7. Don't be pressured to act immediately

- scammers want you to act before you think
- legitimate offers and companies will provide you with enough time to make a decision

8. Use secure & traceable transactions

- do not pay by cash, wire transfer, prepaid money card or gift card

9. Whenever possible, work with local businesses

- these businesses will have proper identification, licensing and insurance

10. Be cautious about what you share on social media

- be sure to set privacy settings
- connect with people you already know
- remember, once you post - it's out there for anyone to see!
